SAHIL CHOUDHARY

Jaipur, Rajasthan, India | +91 90577 77477 | Sahilchoudhary7477@gmail.com
LinkedIn: linkedin.com/in/sahil-choudhary-b952063b2 | GitHub: github.com/SahilChoudhary9057

PROFESSIONAL SUMMARY

Motivated Computer Science Engineering student with an outstanding academic record (Diploma CGPA: 9.9 | B.Tech CGPA: 8.7) and hands-on experience in Python, Machine Learning, and Flask-based web development. Developed 3 end-to-end projects spanning predictive modeling, inventory management, and e-commerce. Quick learner with strong problem-solving skills and a deep interest in Data Science and real-world data-driven applications.

TECHNICAL SKILLS

Programming Languages: Python, Java, C
Data Science & ML: Data Analysis, Data Cleaning, Data Visualization
Libraries/Tools: Pandas, NumPy, Matplotlib | **Web & Database:** Flask, MySQL, HTML, CSS, JavaScript
Tools & Platforms: Jupyter Notebook, Git, VS Code | **Other:** Web Scraping

PROJECTS

Disease Prediction System *Python, Pandas, NumPy, Scikit-learn*

- Built an ML classification model using the Decision Tree algorithm to predict diseases from real-world medical datasets, achieving approximately 80–90% prediction accuracy.
- Performed end-to-end data preprocessing including null-value treatment, feature selection, and label encoding to improve model performance.
- Evaluated model using accuracy score, precision, recall, and cross-validation techniques.

Medical Inventory Management System *Python, Flask, MySQL, HTML, CSS, JavaScript*

- Developed a full-stack, database-driven web application to manage medicine stock and doctor records with a clean UI.
- Implemented CRUD operations and designed efficient MySQL schemas for fast data storage and retrieval.
- Built RESTful backend logic using Flask, reducing manual data handling and streamlining inventory tracking.

E-Commerce Website with Virtual Try-On Feature (In Progress) *Python, Flask, MySQL, HTML, CSS, JavaScript*

- Developing a full-stack e-commerce application featuring user authentication (login/signup) and email verification.
- Designed relational database schema for user and product data; implemented backend using Flask.
- Planning to integrate an AI-based virtual try-on feature using computer vision techniques.

EXPERIENCE

Python Programming Intern — Grras Solutions Pvt. Ltd. *45 Days*

- Worked on Python-based applications and data handling tasks, delivering functional scripts for real-world use cases.
- Strengthened problem-solving and coding skills through hands-on project exposure and mentorship.

Communication Skills Training — MNIT Incubation Center *30 Days*

- Developed professional communication, teamwork, and presentation skills in a startup and industry-oriented environment.

EDUCATION

B.Tech in Computer Science Engineering *2025 – Present*
Poornima College of Engineering, Jaipur | CGPA (3rd Semester): 8.7

Diploma in Computer Science Engineering *Completed: 2025*
Govt. Ramchandra Khaitan Polytechnic College, Jaipur | CGPA: 9.9

ADDITIONAL INFORMATION

Interests: Data Science, Machine Learning, Python Development, Problem Solving
Strengths: Quick learner, comfortable working with real-world datasets, strong analytical and problem-solving ability
Languages: English, Hindi
