PROFESSIONAL SUMMARY

Motivated Computer Science Engineering student with an outstanding academic record (Diploma CGPA: 9.9 | B.Tech CGPA: 9.7) and hands-on experience in Python, Machine Learning, and Flask-based web development. Completed a Data Science internship at Fulminous Software and built 5 projects spanning predictive modeling, inventory management, a live e-commerce site, and computer vision. Quick learner with strong problem-solving skills and a deep interest in Data Science and real-world data-driven applications.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, SQL
Data Science & ML: Pandas, NumPy, Matplotlib, Scikit-learn, Data Cleaning, EDA, Data Visualization, Web Scraping
Web & Database: Flask, REST APIs, MySQL, PostgreSQL, SQLAlchemy, HTML, CSS, JavaScript
Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code, OpenCV

EXPERIENCE

Software Developer Intern – Data Science — Fulminous Software Pvt. Ltd., Jaipur *3 Jun 2026 – 18 Jul 2026*

- Worked on data collection, preprocessing, EDA, visualization, statistical analysis, and machine learning model development using Python, SQL, Pandas, NumPy, and Scikit-learn.

Python Programming Intern — Grras Solutions Pvt. Ltd. *45 Days*

- Worked on Python-based applications and data handling tasks, delivering functional scripts for real-world use cases.

Communication Skills Training — MNIT Incubation Center *30 Days*

- Developed professional communication, teamwork, and presentation skills in a startup and industry-oriented environment.

PROJECTS

Mixpotli – E-Commerce Website (Live) *Python, Flask, SQLAlchemy, PostgreSQL*

- Built a full-stack e-commerce application with product listings, product management, cart functionality, and database integration; deployed on Render (mixpotli.onrender.com).

Disease Prediction System *Python, Pandas, NumPy, Scikit-learn*

- Built a Decision Tree classification model to predict diseases from symptom-based medical data, achieving approximately 80–90% accuracy.
- Performed preprocessing (null-value treatment, feature selection, label encoding) and evaluated using accuracy, precision, recall, and cross-validation.

Medical Inventory Management System *Python, Flask, MySQL, HTML, CSS, JavaScript*

- Developed a database-driven web app to manage medicine stock and doctor records, with CRUD operations, efficient MySQL schemas, and RESTful Flask backend logic.

Face Recognition Attendance System (In Progress) *Python, OpenCV, Computer Vision*

- Building a computer vision application that uses face recognition from a camera feed to support automated attendance tracking.

Virtual Try-On (In Progress) *Python, OpenCV, Computer Vision*

- Developing a Python-based application to explore virtual clothing previews using camera input and computer vision techniques.

EDUCATION

B.Tech in Computer Science Engineering *2025 – Present*
Poornima College of Engineering, Jaipur | CGPA (4th Semester): 9.7

Diploma in Computer Science Engineering *Completed: 2025*
Govt. Ramchandra Khaitan Polytechnic College, Jaipur | CGPA: 9.9

CERTIFICATIONS & ACHIEVEMENTS

- **NPTEL (IIT Kharagpur):** Problem Solving through Programming in C – Elite certificate (Jul–Oct 2025)
- **NPTEL (IIT Madras):** Introduction to Machine Learning (Jan–Apr 2026) | Introduction to Operating Systems (Jul–Sep 2026)
- **Google Cloud Career Launchpad:** Cloud Digital Leader track (Oct 2025) | **Certificate of Appreciation** for Academic Achievement, Govt. Polytechnic College, Jaipur (Aug 2025)

ADDITIONAL INFORMATION

Interests: Data Science, Machine Learning, Python Development, Problem Solving
Strengths: Quick learner, comfortable with real-world datasets, strong analytical and problem-solving ability
Languages: English, Hindi
